Executive Summary

Key Business Insights & Recommendations

Sales Performance

Key Insights

- Total revenue reached R\$13.65M across 99K orders.
- Health & Beauty generated the highest revenue (R\$1.26M), while Bed Bath Table recorded the highest sales volume (11.3K products sold).
- Sales and order volume grew steadily through 2017 and peaked during late 2017 and early 2018.

Recommendation

Focus future marketing and inventory investment on the highest-performing categories while investigating the decline observed in the final reporting period

Product Performance

Key Insights

- Credit Card accounted for over 75% of all purchases, making it the dominant payment method.
- Product categories with the highest revenue did not always achieve the highest customer ratings.
- Several mid-revenue categories maintained excellent customer satisfaction, indicating opportunities for future growth.

Recommendation

Prioritize expanding high-rated product categories and optimize lower-rated high-revenue categories to improve customer satisfaction.

Customer Insights

Key Insights

- Customer satisfaction remained high with an average rating of 4.02/5, and most reviews received 5 stars.
- Orders delivered faster consistently received higher customer ratings (10 vs 19 delivery days).
- More than 92% of all orders were delivered on time.

Recommendation

Continue investing in delivery efficiency, as shipping speed has a clear positive impact on customer satisfaction.

Geographic Analysis

Key Insights

- São Paulo generated both the highest revenue and the largest customer base.
- Bahia achieved the highest average revenue per customer (R\$157), indicating stronger customer value despite a smaller customer base.
- Revenue distribution varies significantly across Brazilian states, highlighting opportunities for regional growth strategies.

Recommendation

Expand customer acquisition efforts in high-value states while maintaining strong market share in São Paulo
